

Letter to the TPO, MNNIT Allahabad

Referring to the Training and Placement Office Policy document-

- Section 2(3) on Pg.3, has not been violated by me. I have not submitted any fake, irrelevant or misleading information on the Student Placement Portal.
- The point no.3 of Section 3 states that all deadlines are to be adhered to and will not be extended under any ordinary circumstances. This itself validates that the situation under which the deadline to apply for **McKinley & Rice** was extended, was not ordinary.
- I have never involved in any kind of unfair means during the Internship or Placement Process, hence, I have not violated the Rule no.9 of Section 3.
- It is also mentioned to cooperate with the Training and Placement Representatives, abiding which I reported to the TPO office at the stipulated time as communicated in the TPO Notice ECE 2k25 WhatsApp Group.

Valid points to be noted –

Concerning McKinley & Rice, The TPO email for the Recruitment Drive came at 5:13PM and that for the Internship Drive came at 6:29PM . The Deadline to apply for both of these was given as 10:30PM, which has to be strictly adhered to as per Section 3(3). Around 4 Hours passed, still the link to Register for the company (given in the email) was not working. Students were unable to open the official TPO website [tpo.mnnit.ac.in], neither with LAN-Proxy nor with Mobile Data connection. Nothing was done to solve this issue. At the last moment, at 10:26PM, the deadline was extended till 11:30PM. Then at 10:29PM, a message was posted on the TPO Notice WhatsApp Group to connect to MNNIT proxy server and set the proxy on **172.31.100.25**. They also gave a link in this message <https://tpo.mnnit.ac.in/new.portal>

Even this was not working as informed by few students. I posted 2 pictures of my Laptop Screen and asked to extend the deadline of **11:30PM** as the site was not opening.

1. All the Male TPRs live in the New Boys Hostel, and they are well aware of the issues faced by students while connecting to LAN/Proxy in their hostel rooms. Then **why didn't they give an alternate option to the MNNIT Proxy Server/LAN?**.

I personally do not have a LAN Cable with me, and during the application process, the LAN/Proxy failed multiple times and got disconnected. I was trying for half an hour but didn't have the option to use Mobile Data to apply. Other students faced a similar issue.

1. The TPRs had ample time from 5:13PM to 10:30PM. **Not a single time did they ask the students whether the LAN/Proxy Server is working or not, before asking to use it.** How were they so much confident that the LAN wouldn't cause any difficulty in the meanwhile and will not waste the time of the students?
